EDUCATION

2012 - 2016

NMAMIT

- Bachelor Of Engineering

TECHNOLOGY AND TOOLS

- AI/LLM, JIRA, Automation, Manual Testing
- Postman, Appium, selenium, Appium, Agile
- SQL, No SQL, MongoDB, Linux, VS code
- Git, Docker, AWS cloudwatch, pytest, API Testing, Docker, playwright, AI Driven Tests
- Behave, Confluence, Jenkins(CI/CD), Allure Report, Wiremock, LoadTesting(Jmeter)
- Framework design, XRAY, kafka, SOAP UI
- Smoke, Regression Testing, Problem Solving, Shift Left Testing, Root Cause Analysis

LANGUAGES

- English - Proficient
- Hindi - Proficient

ACHIEVEMENTS

- One of the key architects in enhancing data-driven automation framework using Selenium, python, PyTest, git and Jenkins.
- The reduced monthly effort by 5-man days by enhancing the Tizen IDE data-driven UI automation framework.
- Best Ideation awards from Samsung R and D Institute

SAIKIRAN SHET

SDET-2/QA

PROFILE

Dynamic and results-driven Automation Engineer with a passion for optimizing cloud infrastructure. Experienced in developing and maintaining test automation tools, enhancing CI/CD pipelines, and designing robust API test frameworks. Professional in Agile Test Methodologies, SDLC, and Software Testing Life Cycle. Highly skilled Engineer with over 8+ years of experience in test planning, designing, and execution of backend API testing across major cloud platforms. Adept at creating and maintaining test automation for regression testing. Brings a strong background in container-based technologies, particularly in Docker, combined with a critical thinking approach and an analytical mindset to solve complex problems, identify testing gaps, and drive continuous improvements. Keen interest in learning and implementing the latest testing technologies and frameworks.

WORK EXPERIENCE

SDET-2

2023 AUGUST - PRESENT

Sequoia Consulting Group

- Revising regression test cases and executing regression suites to ensure the continued stability of simulator dashboard
- Setting up Framework for test execution, retrieving failure reports, and conducting analysis to make informed sign-off decisions.
- Developed automation frameworks for both front end and back end. Conducting debugging and in-depth failure analysis in collaboration with developers and product owners to identify and resolve issues.
- Coaching team members in identifying team goals and evaluating team progress for continuous improvement.

SENIOR QA ENGINEER

2022 AUGUST - JULY 2023

Biofourmis India Pvt Ltd

- Web App Manual and Automation Testing.
- Strong Experience in test planning and design of backend API testing for various business and technical scenarios
- Collaborating closely with developers, product managers, and key stakeholders to ensure alignment and effective

SENIOR QA ENGINEER

FEBRAURY 2019 - AUGUST 2022

Samsung R and D Institute

- Designed Selenium test automation Data Driven framework for navigation and other systems.
- Published and debugged BDD reports to stakeholders and planned measures for Samsung IoT Devices
- Delivered critical & priority automation scripts within strict deadlines for new features.

ENGINEER

FEBRAURY 2017 - FEBRAURY 2019

Life Signal India Pvt Ltd

- Worked on IoT Device testing and automating the device as per the requirement.
- Experience with testing mobile applications (Android, iOS) and automated test cases using Appium with extensive use of pytorch, matlab.
- Worked closely with the functional team (Dev) to follow the user-centric quality of feature design by monitoring KPIs, customer VOC and feedback
